Token Generation Event Guide

Starts on November 14, 2017 at 12:00 UTC

tokenbox.io/tge

What, How and When

The Tokenbox's Token Generation Event (token sale) will take place starting on November 14, 2017 at 12:00 UTC. The sale participation is only available through our official site – tokenbox.io. We've worked closely with Zerion to develop a robust token portal which will handle your participation and purchasing.

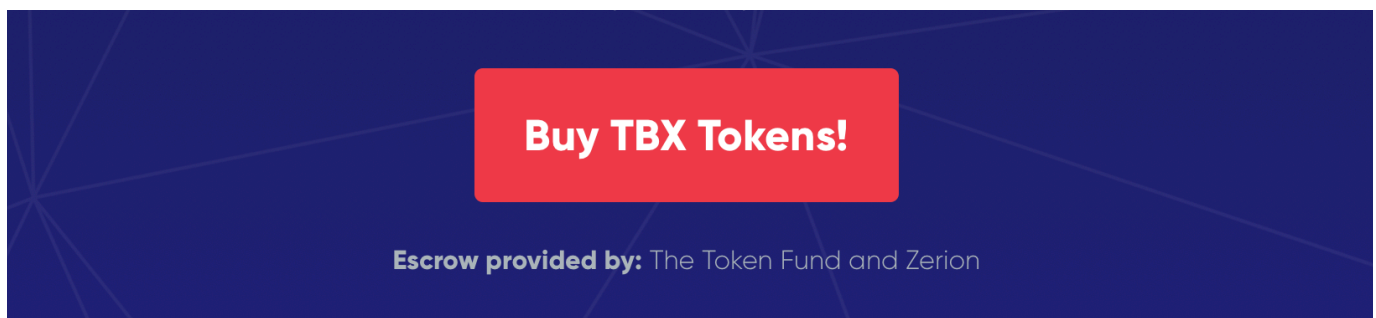

In the **Section 1** of this instruction, we'll discuss how to securely participate in the Tokenbox's token sale. It is imperative that you follow instructions on the official website and community channels. We want to ensure the safety and security of the complete checkout process.

Before you can participate in the token sale, you must ensure that you have either BTC or ETH, as these will be the only acceptable forms of payment. Obtaining either of these assets is quite easy and the process is well documented on the web. For those who don't know how, you can purchase both BTC and ETH at a number of [exchanges](#).

You also need to have an Ethereum address (wallet) to get TBX tokens. This should be the address (wallet), for which you own the private keys. If you do not have such Ethereum wallet, the best way is to create it at myetherwallet.com. For more details, see the **Section 2**.

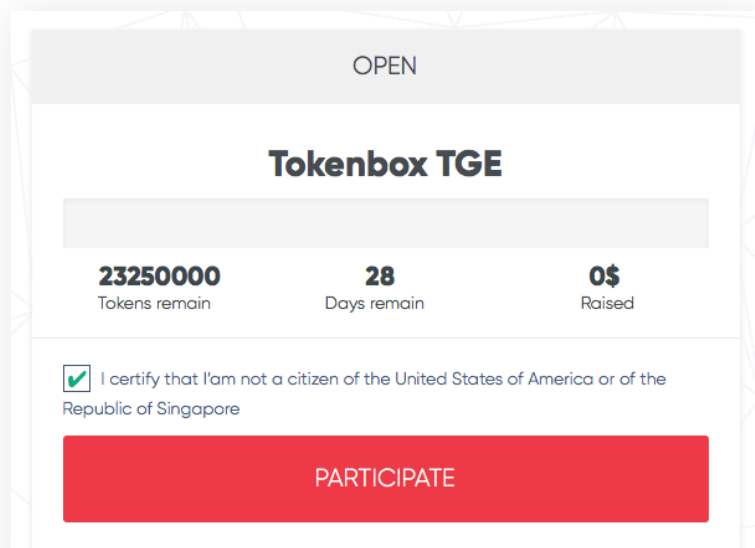

1 Click the “Buy TBX Tokens” button

Navigate to the Tokenbox TGE page and click the “**Buy TBX Tokens**” button.

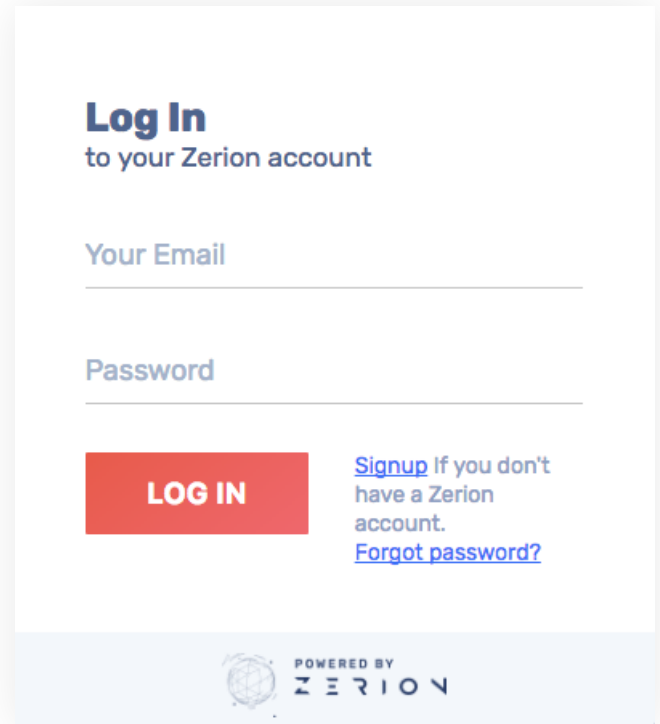

2 Confirm eligibility

A new window will open (wallet.tokenbox.io). Verify your eligibility to participate in the token sale acknowledging that you are not a resident or citizen of the United States of America or the Republic of Singapore.

3 Sign up with Zerion

You will be asked to sign in or create an account with Zerion with an email address and password. If you don't have a Zerion account already, you will need to verify your email by clicking a link sent to you in an email with the subject line "Confirm your Zerion Account" sent from **noreply@zerion.io**.

POWERED BY
ZERION

4 Enter your Ethereum ERC20-compatible address

This is the address to which TBX tokens will be sent when they are distributed after the sale concludes. The TBX token is an ERC-20 token, so this address must be an ERC-20 compatible Ethereum address. Recommended wallets include MyEtherWallet, Jaxx, Mist, and imToken.

Destination address:

Ethereum ERC20 Return Address:

This will be the wallet that your tokens are sent to.

☒ I verify that is my personal ETH wallet and not an exchange

Which Wallet is this?

Good - My Ether Wallet

5 Specify the type of wallet you are using to accept TBX

And verify that the wallet is your personal wallet and not an exchange-hosted wallet.

Destination address:
Ethereum ERC20 Return Address:

Which Wallet is this?
Good - My Ether Wallet
▼

This will be the wallet that your tokens are sent to.
☒ I verify that is my personal ETH wallet and not an exchange

6 Choose your payment method: BTC or ETH

Payment Information:

Payment method

 Bitcoin

 Ethereum

7 Enter the number of TBX you wish to purchase

How much tokens would you like to purchase?
100|

Minimum amount: 1
Maximum amount: 100 000 000

8 Review and accept the Tokenbox crowdsale agreement

TOKENBOX CROWDSALE TERMS

[Full Crowdsale Terms](#)

Your purchase of any TBX tokens ("Tokens") during the Crowdsale (as defined below) from Tokenbox LLC. By purchasing Tokens from us during the Crowdsale, you will be bound by these Terms and any terms incorporated by reference. If you have any questions regarding these Terms, please contact us at support@tokenbox.io.

These Terms constitute the entire agreement between you and us relating to your purchase of Tokens from us. We may assign our rights and obligations under these Terms. Our failure to exercise or enforce any right or provision of these Terms will not operate as a waiver of such

☒ I accept the terms of the crowdsale agreement

CANCEL

PURCHASE

9 Click the "Purchase" button

10 Send the exact amount of BTC or ETH to the specified address

Once you select the number of TBX tokens you wish to purchase, you will have 15 minutes to complete the invoice. You must send the exact amount listed on the screen to the provided address. If you send more or less than the listed amount, your purchase may be refunded. You can enter the address manually or scan the QR code with your mobile device.

This Invoice will expire in 14:42
[CANCEL ORDER](#)

PLEASE SEND EXACTLY
0.03099709BTC

TO

11 Wait for 3–6 confirmations

You will have to wait for a certain number of confirmations depending on your chosen payment method. If you are paying in BTC, we require three confirmations before the purchase is complete. For ETH, the purchase is finalised after six confirmations.

CONFIRMED

[VIEW ON BLOCKCHAIN](#)

Congratulations!
You are now the owner of TBX tokens.

1 Go to [MyEtherWallet](https://www.myetherwallet.com) website

Make sure that you are on a computer you trust and that you access the website via an HTTPS address. If you're using Chrome, you should see a green lock notification in the address bar.

2 Provide a Strong Password that will be used to access your wallet

1. Create a strong password, using upper and lower case letters, and also numbers and symbols (e.g., "@", "^", etc.).
2. Do not lose this password. Losing this password is equivalent to losing all of the ETH and other ERC-20 tokens including TBX stored in your account.

Click the **"Create New Wallet"** button.

A screenshot of the 'Create New Wallet' form. The title 'Create New Wallet' is at the top. Below it is a label 'Enter a password'. There is a text input field with a red border and a red error message 'Do NOT forget to save this!'. To the right of the input field is an eye icon. Below the input field is a blue button labeled 'Create New Wallet'.

3

Save Your Keystore File

Follow the instructions to save your keystore file. This file contains your private and public keys and is required every time you want to access your account.

Save your **Keystore** File.

[Download Keystore File \(UTC / JSON\)](#)

Please note that you won't be able to access your account without this file and the password from the previous step. Losing either one of them is equivalent to losing all of the ETH and other ERC-20 tokens including TBX stored in your account.

4

Backup Your Private Key

If you would like to make this account accessible by other Ethereum wallets, you can export and backup your private key.

It is important to remember that you should never share your private keys with anyone else. If your wallet address (i.e. your public key) is the equivalent of your bank account number, then your private wallet key is your PIN. If anyone obtains your private key, they will have access to all of your funds.

Save Your **Private Key**.

a35d49c2318aa03163fe98da5cec6169cb21edade0928236d6c61302f4180186

Print Paper Wallet

Do not lose it! It cannot be recovered if you lose it.

Do not share it! Your funds will be stolen if you use this file on a malicious/phishing site.

Make a backup! Secure it like the millions of dollars it may one day be worth.

Save Your Address. →

Click the **"Save Your Address"** button.

5

Unlock Your Wallet to View the Public Address

Select the "Keystore File (UTC / JSON)" and the keystore file you've downloaded in the previous step. Input your password and click on the "Unlock" button to unlock it.

How would you like to access your wallet?

- ☐ Metamask / Mist ?
- ☐ Ledger Wallet ?
- ☐ TREZOR ?
- ☐ Digital Bitbox ?
- ☒ Keystore / JSON File ?
- ☐ Mnemonic Phrase ?
- ☐ Private Key ?
- Parity Phrase ?

Select Your Wallet File

SELECT WALLET FILE...

Your wallet is encrypted. Good! Please enter the password.

.....

Unlock your Wallet

Unlock

6

Save your Public Address

At this stage, you should now be able to see your Ethereum public address under the "Your Address" label.

*You will need to provide this public ETH address (wallet) during your purchasing TBX tokens. **Do not lose your password and the keystore file, as you will need to use them in the Token Generation Event.***

? Your Address

0x938B78E19190F1Bf95e408856316C55520186A81
